

Weight Gain During Pregnancy

A healthy and balanced diet is an essential component of your prenatal care. Ideal weight gain is based on your pre-pregnancy weight. You do not need to eat extra calories to support your pregnancy. It is recommended that you eat approximately 2,500 calories per day. A total weight gain of 20-25 pounds is generally recommended. However, your provider may individualize your goals based on your specific needs which are usually based on your body mass index (BMI).

Institute of Medicine Weight Gain Recommendations for Pregnancy

Pre-Pregnancy Weight Category	Body Mass Index (BMI)*	Recommended Range of Total Weight (lbs)	Recommended Rates of Weight Gain ** in the 2nd and 3rd Trimesters (mean range in lbs/wk)
Underweight	Less than 18.5	28 - 40	1 (1 - 1.3)
Normal Weight	18.5 - 24.9	25 - 35	1 (0.8 - 1)
Overweight	25 - 29.9	15 - 25	0.6 (0.5 - 0.7)
Obese (Includes All Classes)	30 or greater	11 - 20	0.5 (0.4 - 0.6)

* Body mass index is calculated as weight in kilograms divided by height in meters squared or as weight in pounds multiplied by 703 divided by height in inches.

** Calculations assume a 1.1-4.4 lb weight gain in the first trimester.
